## Press release

**NEW:** From now on, the EurObserv'ER thematic barometers will be published in unilingual versions: French and English Barometers will be separate documents. All versions are freely downloadable at: [www.eurobserv-er.org](http://www.eurobserv-er.org)

From: EurObserv'ER

Subject: **Released: Bridging report**  
Bridging the gap between Member States' progress report of 2013 and 2015

(PDF, English, 80 pages)

Date: July 2015

Pages: 3

## EurObserv'ER - Everything about the EU28 situation regarding RES 2020 targets

*Access to early information on RES growth in the EU 28 members States is the core aim of the EurObserv'ER barometers since their creation in 1999. 2014 being a year without progress report from Member State on their situation of RES shares, EurObserv'ER has filled this gap by producing its own bridging report based on 2013 data.*

Renewable energies once again scored points in the European Union in 2013, both for electricity production and energy consumption in general. Among the EU28 Members States, three States have already achieved their 2020 targets, namely Bulgaria, Estonia, and Sweden. Nevertheless, the EurObserv'ER report shows great disparity of national efforts made to reach 2020 targets.

This report is one of the EurObserv'ER contributions that can be used to fuel contributions the COP21, an event that will start on November 30th in Paris.

RENEWABLE ENERGY IN EUROPE

BRIDGING THE GAP BETWEEN MEMBER STATES'  
PROGRESS REPORTS OF 2013 AND 2015

---

### About the EurObserv'ER Barometer

The EurObserv'ER Barometer regularly publishes indicators reflecting the current dynamics in renewable energies (solar, wind, hydropower, geothermal and biomass, biogas, biofuels) worldwide and within the European Union.

Barometers published are all available for download. Direct links to all 2015/2014/2013 EurObserv'ER publications:

The EurObserv'ER barometer is a project supported by the European Commission within the DG Energy "Intelligent Energy Europe" programme. It is also supported by Ademe, the French Environment and Energy management Agency, and Caisse des Dépôts.

Co-funded by the Intelligent Energy Europe  
Programme of the European Union
